

Cobra 150 Six Inch Crawler

*Pipe inspection from
6" to 24"*

THE COBRA 150

The Cobra 150 multi conductor wheeled transporter is a compact, rugged sewer crawler small enough to inspect 6" relined pipe. Its compact design ensures its capacity to inspect pipe sizes from 6" to 24" with the addition of the various wheel sets that optimize the camera position in all pipe sizes.

The Cobra 150 crawler operates with the new Cobra Version 9 PTZ Camera having all the functionality of our current PTZ camera with our directional lighting system providing illumination for pipe up to 72". The Luxeon lighting system is "cold" and will not overheat the camera module. Lights operate on the same circuit as the camera power so when the camera is powered, the lights automatically illuminate at full brightness. This approach eliminates the need for the conventional Power Control Unit. The lighting system provided by Cobra creates an unmatched video inspection quality with Cobra once again setting the standard for the industry.

GENERAL FEATURES

- Operates in 6" relined pipe through 24"
- Operates with Cobra PTZ Version 9 Camera which can be used with other crawlers
- Forward / Reverse speed control, all wheel drive
- Single swivel connector at rear of transport reduces wear and damage to connection
- Special lowering/retrieval harness provided
- Superior traction
- Tested to 20 psi
- Joystick control of transporter and camera for operational simplicity
- Various wheel sets for quick, simple wheel change for various pipe sizes
- 360° rotate function
- Crawler width: 4"
- Overall Length with camera: 20"
- 0-60' Per Minute

All Specifications subject to change.
